

Facility Response Plan: 3-4-15 to 3-6-15 07:00-16:00

Type/Duration: Live/3 days

Scenario: Extreme amounts of rain and snow melt. Secondary containment drain valves were required to be open for an extended period of time.

Actions that took place:

- Operators opened secondary drain valves.
- Operations continued to monitor tank levels and plumbing for leaks.
- Operations closed drains once containment was drained out

Equipment used:

Company radios, valves on secondary containment.
