**CERTIFYING SIGNATURE:**

Boom Deployment: 10-04-2016 11:00-13:00

Type/Duration: Drill Exercise/2 hrs.

**Scenario:** Petroleum Crude Oil Solution on river. Oil coming from containment pond draining into the river causing a sheen. River moving at 4mph, winds at 5mph sw. Wind is blowing product down river and to the bank. Boom to be placed from boat ramp area at a 45 degree angle to allow skimmer and trucks to remove sheen.

**Actions that need to take place:**

- Shut down all operations.
- Verify that no one is injured.
- Call our Operations Control Center.
- Verify that all valves are shut, call response team to assist with cleanup
- Call Willow Island L&D, plants to have them shut down water intake system.
- Notify USCG, NRC, Weavertown (OSRO), BBU (cleanup)
- Get boat on river in a timely manner, place boom in river, place absorbent booms on river bank to keep product away from land

**Equipment used:**

- Boat
- Boom
- Absorbent booms
- Pads
- Truck
